

AWANTIKA SRIVASTAVA

Data Scientist | Machine Learning | NLP | GenAI | FastAPI

+91-8920482037 | sawantika81@gmail.com | [LINKEDIN](#) | [Github](#)

PROFILE SUMMARY

Data Scientist with **2+ years of hands-on experience** in designing, developing, deploying, and maintaining **AI/ML models and data-driven solutions**. Strong proficiency in **Python and SQL**, with solid experience in **machine learning model development, statistical analysis, NLP, and Generative AI**. Proven ability to own **end-to-end model lifecycles**, build **APIs for model serving**, and collaborate with cross-functional stakeholders to deliver **scalable, production-ready AI solutions**.

CORE TECHNICAL SKILLS

- **Programming Languages:** Python (Advanced), Numpy, Pandas, C++, SQL, Scikit-learn, Jupyter Notebook
- **Statistics & Mathematics:** EDA, Statistical Modeling, Hypothesis Testing, Confidence Intervals, A/B Testing, Scenario Analysis.
- **Machine Learning:** Supervised & Unsupervised Learning, Regression, Classification, Clustering, Random Forest, Decision Trees, SVM, KNN, K-Means, XGBoost, Model Evaluation Metrics (Precision, Recall, F1-score, ROC-AUC).
- **Deep Learning :** Neural Networks, CNN, RNN, LSTM, Transformers (BERT), Transfer Learning, Model Fine-tuning, Computer Vision, TensorFlow, PyTorch.
- **NLP:** Text preprocessing, Tokenization, Sentiment Analysis, Transformer-based models, NLU
- **GenAI & LLMs:** LLMs, Prompt Engineering, RAG, LangChain.
- **Backend & Deployment:** FastAPI, REST APIs, Model Serving, API Integration
- **MLOps & Lifecycle:** End-to-End ML Pipelines, Model Deployment, Monitoring, Best Practices
- **Tools & Platforms:** Git, GitHub, AWS (EC2, S3 – exposure)
- **Professional Skills:** Problem Solving, Clear Communication, Stakeholder Collaboration

EXPERIENCE

Data Scientist / Machine Learning Engineer | PPS International Pvt. Ltd.

January 2024-Present

- Designed and developed **AI-powered backend services** using **Python and FastAPI**, exposing ML and LLM models through **RESTful APIs**.
- Built, containerized, and ran backend services using **Docker**, supporting consistent development and deployment workflows.
- Deployed and tested containerized services on **AWS (EC2, S3)** with guidance from senior engineers, ensuring reliability and scalability.
- Implemented **LLM-based workflows** including prompt engineering, document ingestion, and retrieval pipelines for production use cases.
- Applied foundational **HTTP and client-server concepts** to design clean request/response contracts and robust API interfaces.
- Collaborated with cross-functional teams using **GitHub**, contributing to code reviews, feature development, bug fixes, and testing.
- Wrote maintainable, well-documented code and participated in improving **service reliability and overall end-user experience**.

PROJECTS

Railway Driver Assistance System (RDAS) | Enterprise ML Project

- **Designed** and deployed a real-time **computer vision** ML system for unsafe driver behavior detection using **CNN-based models (SSD MobileNet with TensorFlow)**.
- Built **end-to-end ML pipelines** including data ingestion, preprocessing, feature extraction, model training, evaluation, and deployment.
- Optimized models using **TensorFlow Lite** to achieve **20–25 FPS real-time inference** with **<150 ms latency** on production/edge environments.
- Exposed model inference through **FastAPI-based REST services** for integration with downstream systems and monitoring tools.
- Performed **error analysis, bias checks, and performance monitoring** to improve model robustness and operational reliability.

Chatbot Using LLM & RAG | Applied ML Project

- Built a **Lightweight LLM-Powered chatbot** using **TinyLLaMA** to answer user contextual questions over structured resume data.
- Implemented a **Retrieval-Augmented Generation (RAG) pipeline**, including document indexing and similarity-based retrieval, to ground LLM responses.
- Applied **prompt engineering and response evaluation techniques** to improve answer relevance, consistency, and factual accuracy.
- Developed **FastAPI-based inference endpoints** to serve the LLM pipeline in a scalable manner.
- Deployed the application using **Streamlit**, focusing on low memory usage, fast inference, and user-friendly interaction.

YouTube Comments Sentiment Analyzer | link - <https://youtube-ai-analyzer-ndzqo6r2mepjtsdjmwxl.streamlit.app/>

- Built an end-to-end **NLP pipeline** for sentiment analysis using **transformer-based models (BERT/DistilBERT)**.
- Performed text preprocessing, feature extraction, model training, and evaluation on large volumes of user-generated data.
- Evaluated model performance using **precision, recall, and F1-score**, and iteratively improved results through error analysis.
- Served the trained model via **FastAPI APIs** for real-time inference and integration.

CERTIFICATION

- IBM Data Science & AI Certification
- AWS Generative AI with Large Language Models
- OpenCV Computer Vision Certification

EDUCATION

IMS Engineering College, Ghaziabad

September - 2020

Bachelor of Technology (Electrical and electronics engineering)
